

Declaration
Radiation Safety
Microbeam hall, Division of Nuclear Physics

I declare that I have passed either 1. The official university radiation safety course with content approved by the SSM, given by the Lund university radiation protection physicist Hanna Holstein or 2. The exact equivalent of this course (based on the English version of the official university radiation safety course, ref. Hanna Holstein), given by Mikael Elfman at the Division of Nuclear Physics.

I have received the required information regarding rules and regulations (radiation safety, dosimeters, radiation sources, run logbook, access during deuteron runs etc.), including general safety regulations and risk assessments, concerning research activities in the Microbeam hall and my knowledge of the rules has been approved by Mikael Elfman, responsible for radiation safety at the division and Charlotta Nilsson, responsible for general lab safety. I hereby declare that I will abide by the rules and regulations that are specific to the Microbeam hall activities.

I have read "Safety Regulations for the Division of Nuclear Physics" ("Särskilda säkerhetsföreskrifter vid Avdelningen för kärnfysik") and "General Regulations for the Division of Nuclear Physics" ("Allmänna regler och information för Avdelningen för kärnfysik") and have gone through their contents with a senior scientist at the Division. I hereby declare that I will adhere to the regulations laid down in the above mentioned material.
